## PRACTICAL 2: BUCKET CREATION

Step 1: Go to the AWS website and search for S3.

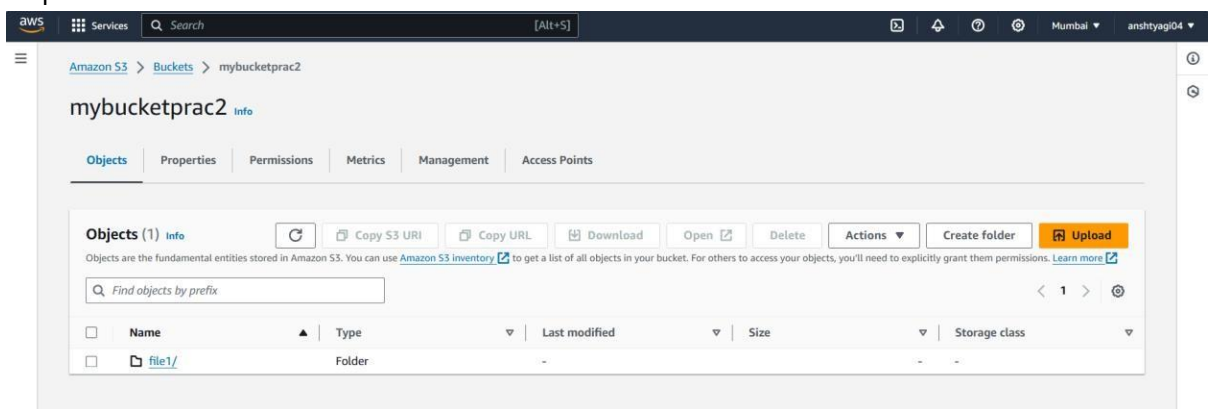

Step2: Click on "Create bucket" and name it as “mybucketprac2”

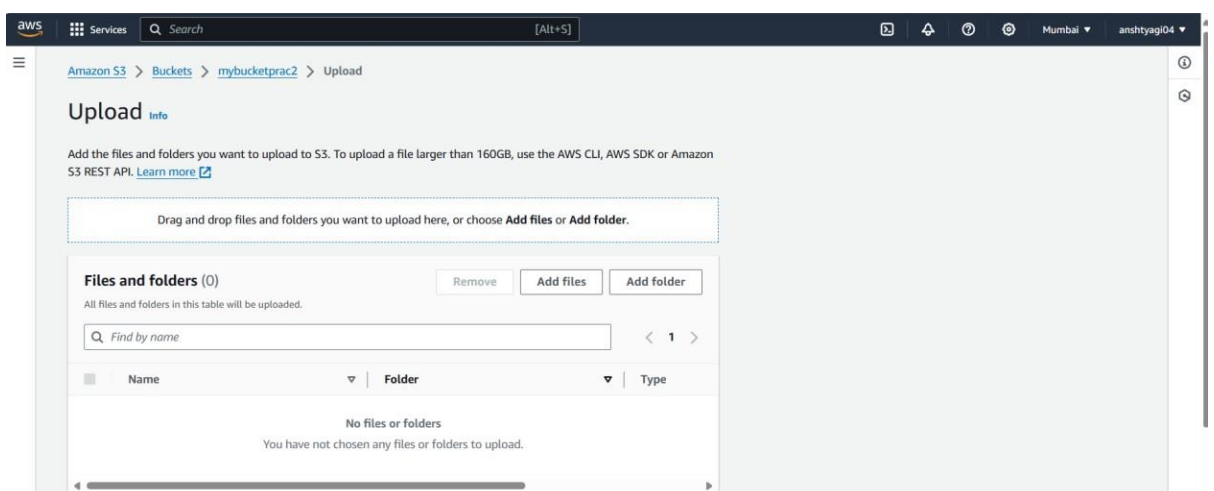

Step3: Create a new folder within the bucket and name it "file1".

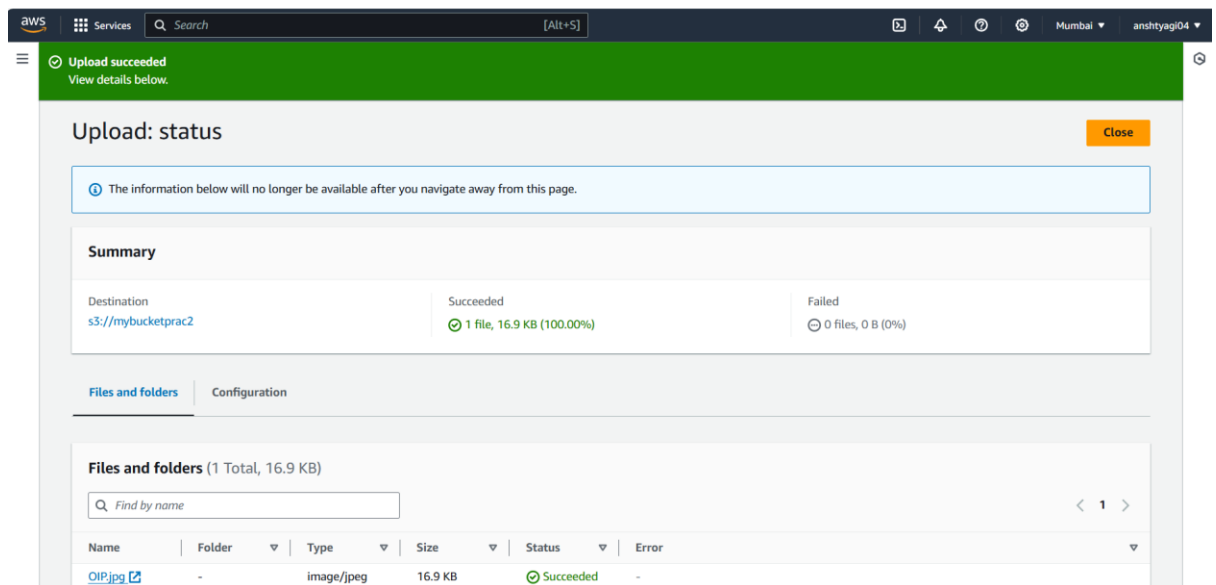

## Uploading Photo

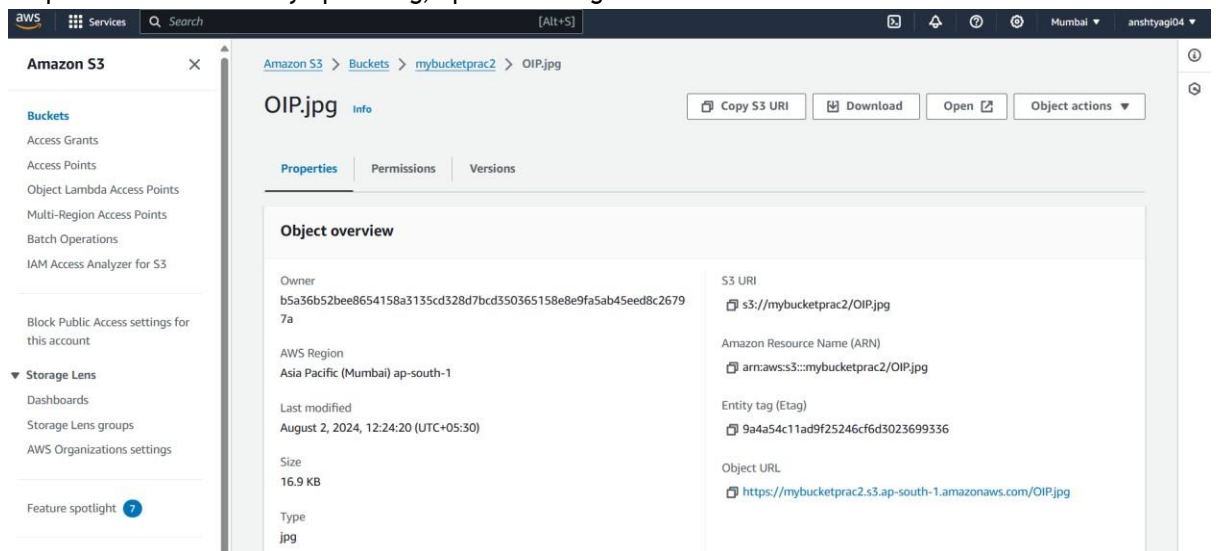

Step 4: Download an image from Google and save it as .png, .jpg, or any other format.

Step5: Go to the "mybucketprac2" bucket and upload the downloaded image

Step 6: After successfully uploading, open the image file.

Step 7: The image is now uploaded.

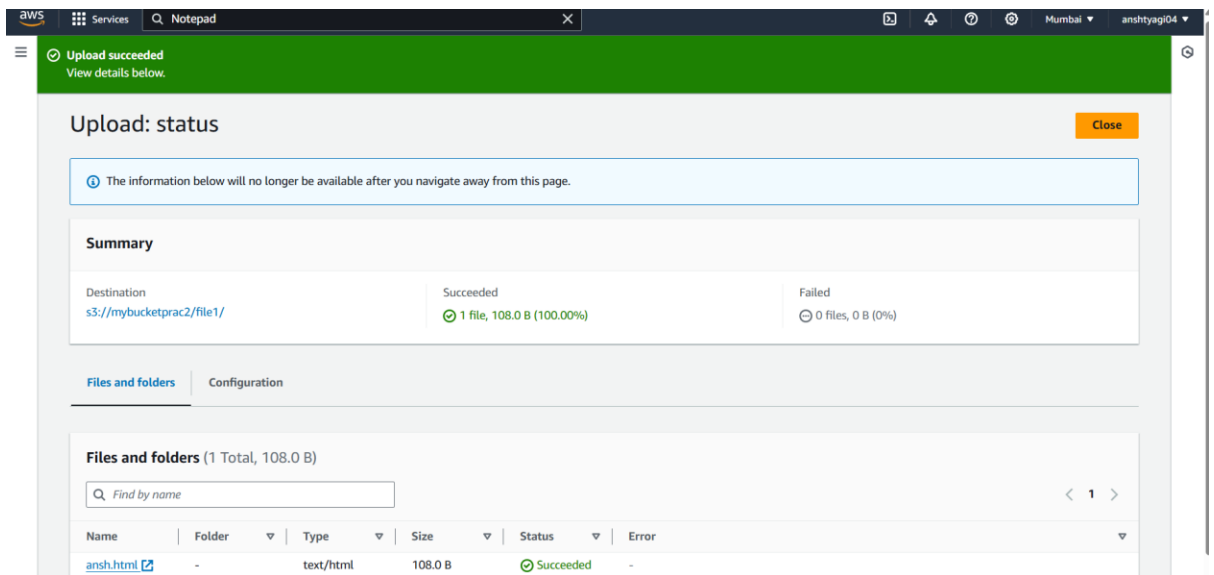

## HTML Page

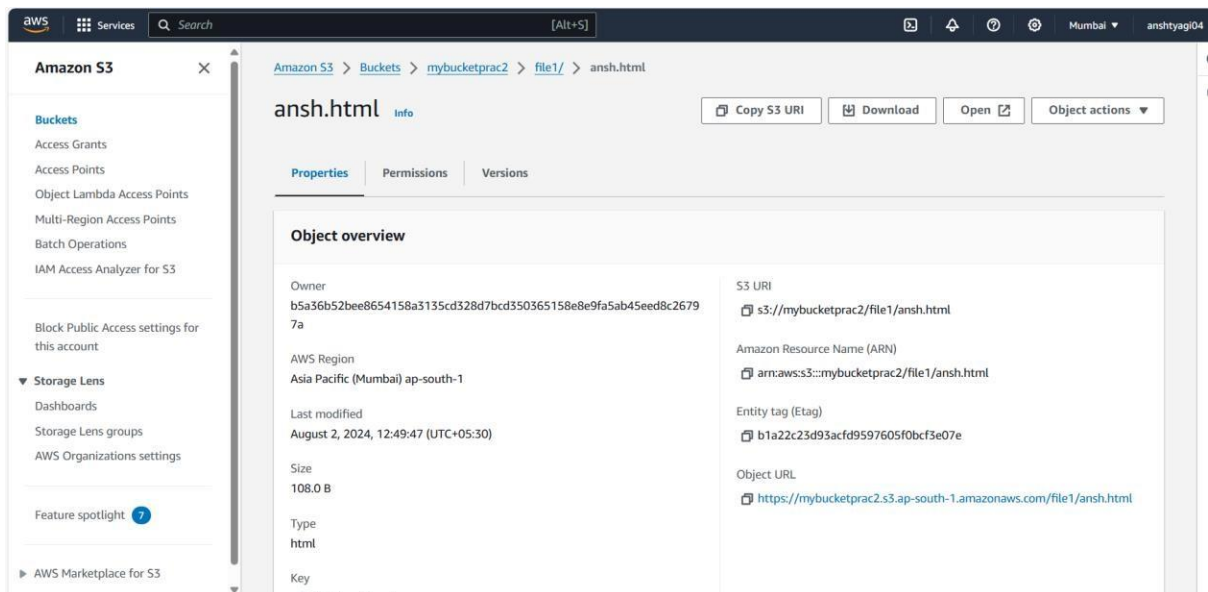

Step8: Save a simple HTML file in Notepad as “ansh.html”.

The screenshot shows the AWS S3 console interface. At the top, there's a navigation bar with the AWS logo, "Services", a search bar, and a "Notepad" tab. Below the navigation bar, the breadcrumb trail reads "Amazon S3 > Buckets > mybucketprac2 > file1/ > Upload". The main heading is "Upload" with an "Info" link. Below this, there's a message: "Add the files and folders you want to upload to S3. To upload a file larger than 160GB, use the AWS CLI, AWS SDK or Amazon S3 REST API. [Learn more](#)". A dashed box contains the instruction: "Drag and drop files and folders you want to upload here, or choose **Add files** or **Add folder**." Below this, a section titled "Files and folders (1 Total, 108.0 B)" contains a table. The table has columns for "Name", "Folder", and "Type". It lists one file: "ansh.html" with a folder icon, a dash in the "Folder" column, and "text/html" in the "Type" column. To the right of the table are buttons for "Remove", "Add files", and "Add folder". At the bottom, there's a "Destination" section with the text "Destination s3://mybucketprac2/file1/".

## Step9 : Upload the “content.html” file to the "file1" folder

## Step 10: Once the upload is successful, open the uploaded file.

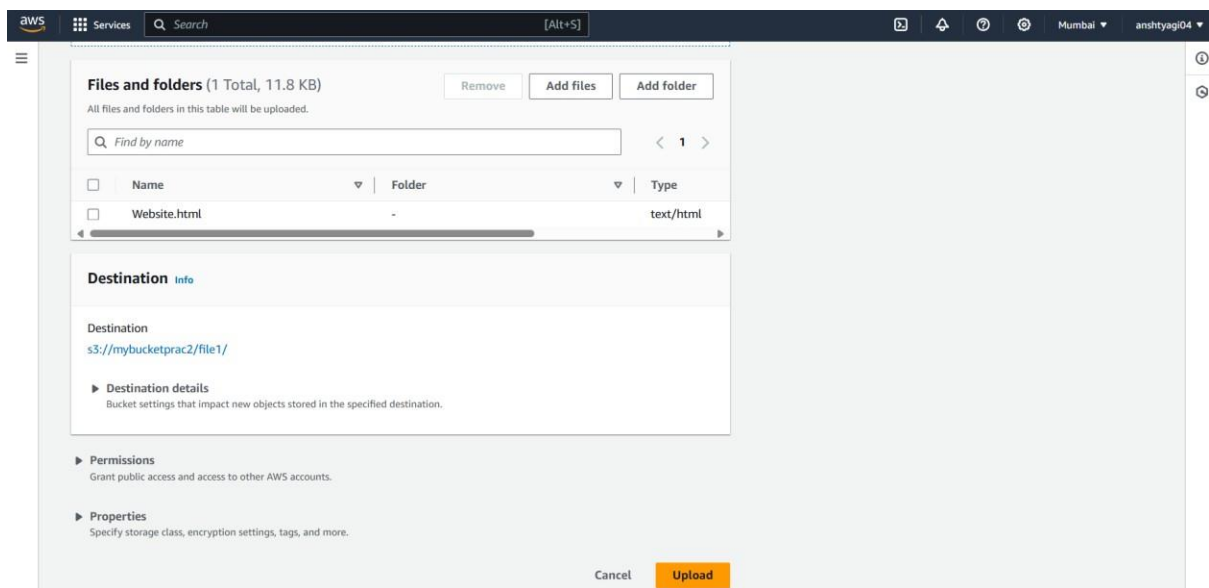

## Step11: Basic HTML page is now uploaded which opens as below.

# My First Heading

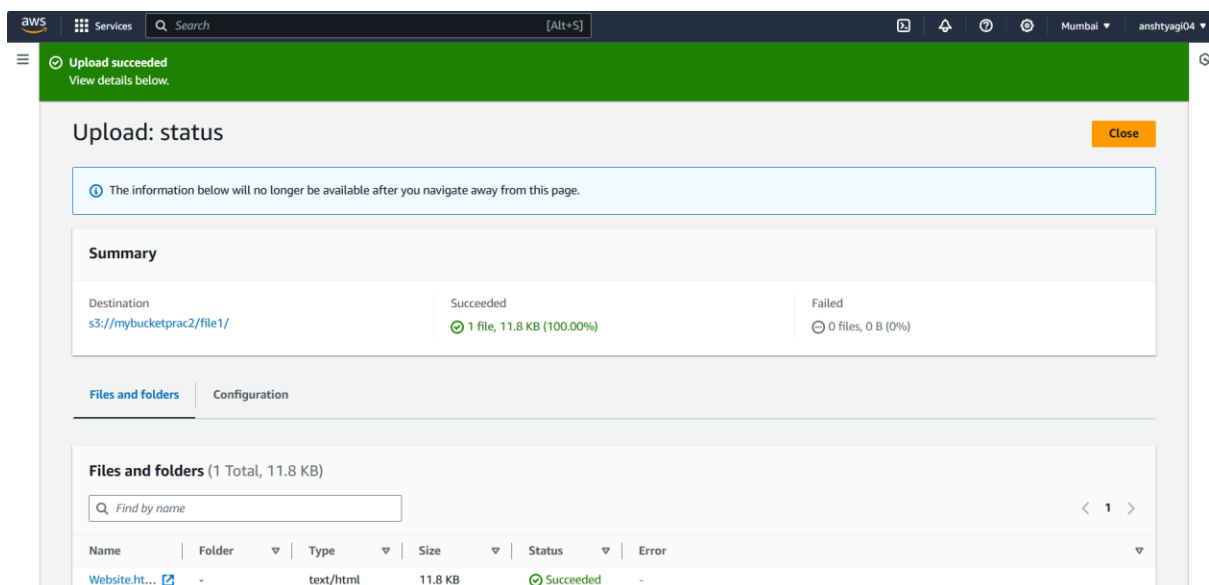

My first paragraph.

## For website Frontend

Step 13: Write the front-end HTML code for a website and save it as “Website.html” in Notepad.

Step 14: Upload the “Website.html” file to the "mybucketprac2" bucket.

Step 15: After successfully upload, open the file to launch your website.

Amazon S3 Buckets mybucketprac2 file1/ Website.html
